

# **Clean Street: Civic Issue Reporting & Tracking App**

**Project Statement:** Clean Street is a smart civic engagement platform that allows users to report and track local public issues such as garbage dumps, potholes, water leakage, and broken streetlights. The system facilitates easy submission of complaints using photos and location data, enables updates by municipal authorities or volunteers, and encourages community participation through voting and feedback.

## **Outcomes:**

1. Users can report civic issues with location, photo, and description.
2. Complaints are automatically routed to the respective local authority or volunteer.
3. Users and authorities can track complaint status in real-time.
4. Community members can vote and comment on complaints.
5. Admins can monitor complaints, user activities, and generate reports.

## **Modules:**

**Module A:** User & Complaint Management

**Module B:** Location-based Reporting & Assignment

**Module C:** Community Voting & Comments

**Module D:** Admin Dashboard & Analytics

## **Milestone 1: Weeks 1-2 - User & Complaint Management**

- Enable user registration and login with role-based access.
- Provide a dashboard for users to view their submitted complaints.
- Allow users to edit their profile details.

### **Output:**

- Login and registration pages.
- User dashboard with complaint list.
- Profile edit page.

## **Milestone 2: Weeks 3–4 – Complaint Reporting & Assignment**

- Create form to submit complaints with photo and description.
- Integrate map for selecting location.

### **Output:**

- Complaint submission form.

## **Milestone 3: Weeks 5–6 – Voting & Comment System**

- Enable users to upvote/downvote complaints.
- Allow commenting on complaint pages.
- Track and display complaint status.

### **Output:**

- Voting buttons and counters.
- Comment section UI.
- Status update tracker.

## **Milestone 4: Weeks 7–8 – Admin Panel & Reports**

Create admin dashboard for monitoring complaints.

Add report generation features.

Include tools to manage users and zones.

### **Output:**

Admin dashboard interface.

Demo

## **Database Schema:**

### **Users**

id: Unique identifier for the user

name: Full name of the user

email: Email address

password: Hashed password for authentication

location: User's geographic area

role: Role (user, volunteer, admin)

profile photo: Link to profile image

### **Complaints**

id: Unique identifier for the complaint

user\_id: ID of the reporting user

title: Short issue title

description: Detailed complaint

photo: Link to complaint image

location\_coords: GPS coordinates

address: Physical address

assigned\_to: Assigned office or volunteer

status: Complaint status (received, in\_review, resolved)

created\_at: Complaint submission time

updated\_at: Last update time

### **Votes**

id: Unique identifier for the vote

user\_id: ID of the voter

complaint\_id: ID of the complaint

vote\_type: Upvote or downvote

### **Comments**

id: Unique identifier for the comment

user\_id: ID of the commenter

complaint\_id: Related complaint ID

content: Comment text

timestamp: When the comment was added

## AdminLogs

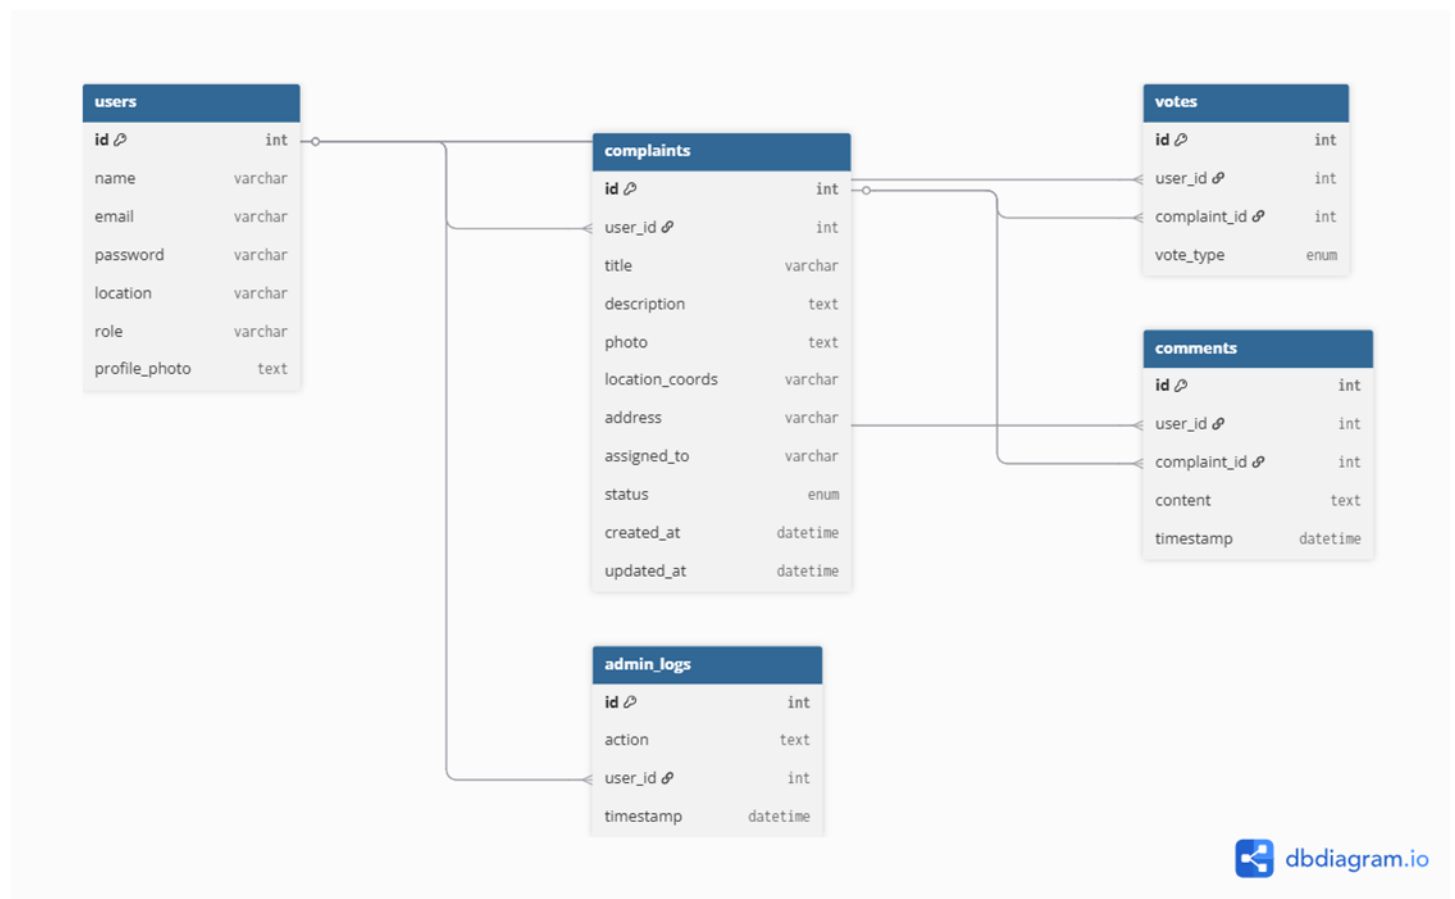

id: Unique identifier for the admin log

action: Description of the action taken

user\_id: ID of the admin performing the action

timestamp: Date and time of the action

### Large pothole on Main Street causing traffic delays

Received

There's a massive pothole on Main Street near the intersection with Oak Avenue. It's been there for weeks and is causing serious damage to vehicles. Multiple cars have gotten flat tires.

Main Street & Oak Avenue

### Broken streetlight in residential area

Received

The streetlight at the corner of Pine Street and 2nd Avenue has been out for over a month. This creates a safety hazard for pedestrians at night.
